

CRMX SuperNova™ – LumenRadio's RDM Controller

CRMX SuperNova is an RDM Controller that comes free of charge with LumenRadio's CRMX Nova™ and CRMX Outdoor™ RDM products.

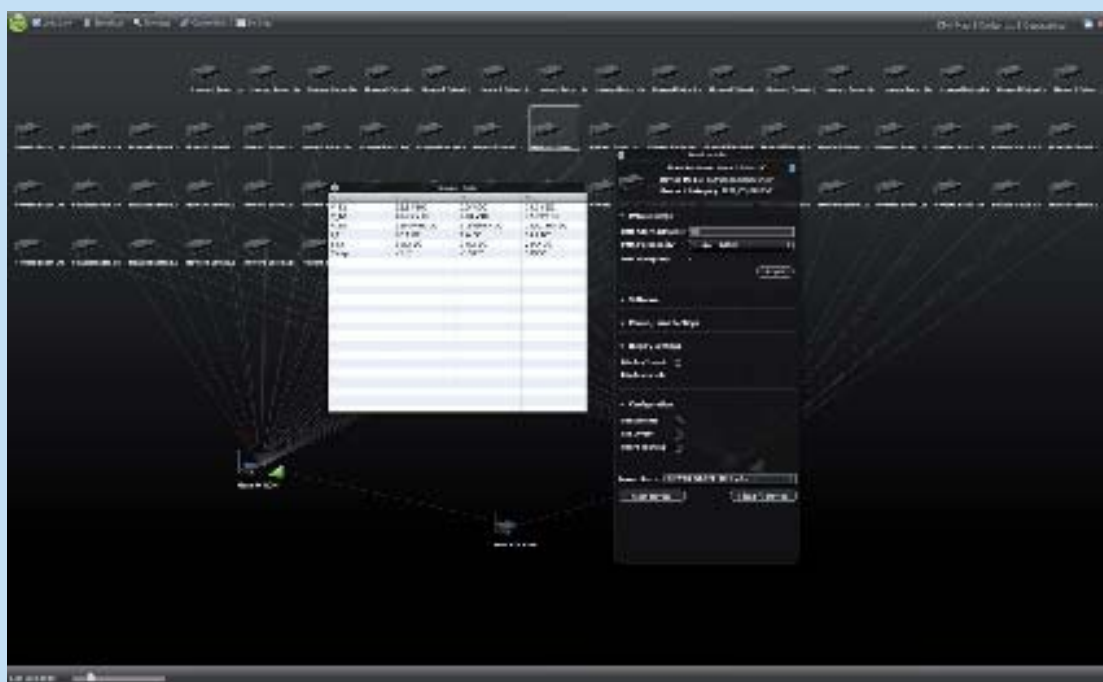

Key innovations and advantages with CRMX SuperNova are:

- 1. Discovery.** All connected RDM devices, wired or wireless, automatically report what kind of equipment they are and what features they have.
- 2. Geographical view.** Visualize your entire system setup and display signal strength for all RF devices.
- 3. Coexistence view.** Monitor the radio spectrum in real time and identify your own and external traffic. Manage the spectrum with easy on-screen tools.
- 4. DMX map.** Drag-and-drop GUI facilities easy DMX addressing and equipment management for your entire RDM system.
- 5. Feedback.** Get error messages, warnings, operational status, temperatures, fan speed, signal strength and more from all RDM enabled devices. Feedback is saved in a SQL database and can be viewed in SuperNova. Logs and warnings can be e-mailed to you.
- 6. Configuration.** Link transmitters and receivers together at your convenience. Adjust output power of transmitters. Set Art-Net, sACN and other Ethernet protocols within the same user interface.
- 7. Cross platform.** CRMX SuperNova is platform independent and can be used on both Windows, Mac OS X and GNU/Linux systems.
- 8. Upgradeable.** You can always download the latest versions of CRMX SuperNova from www.crmxnova.com.

CRMX SuperNova is an RDM Controller that comes free of charge with LumenRadio's RDM products.

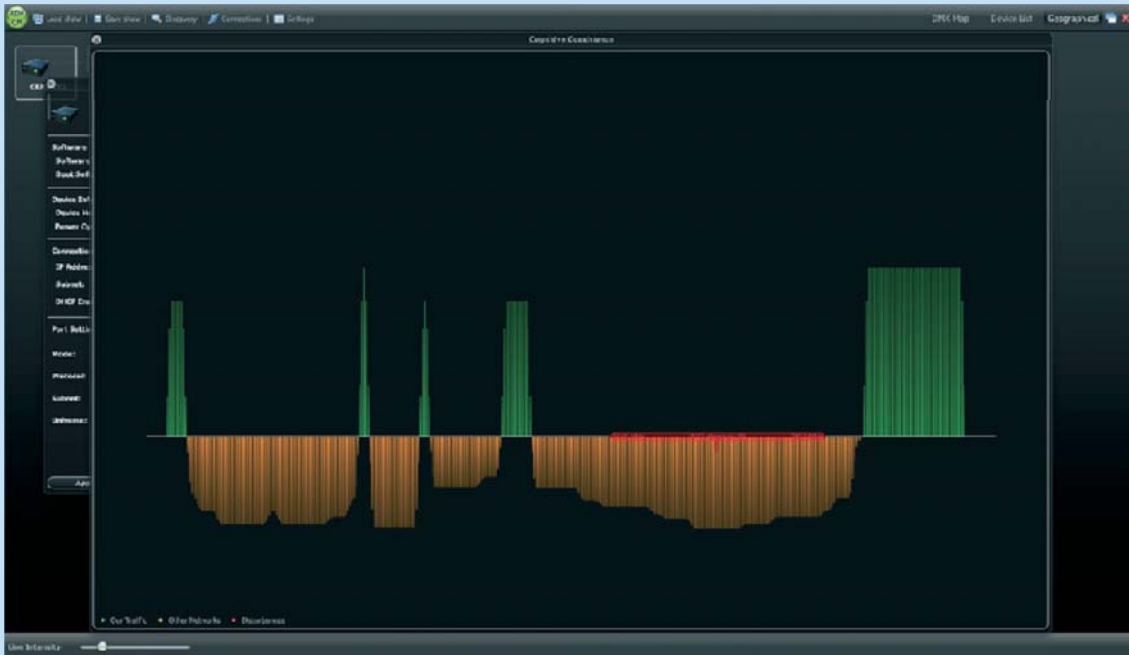

CRMX SuperNova™

Geographical view:

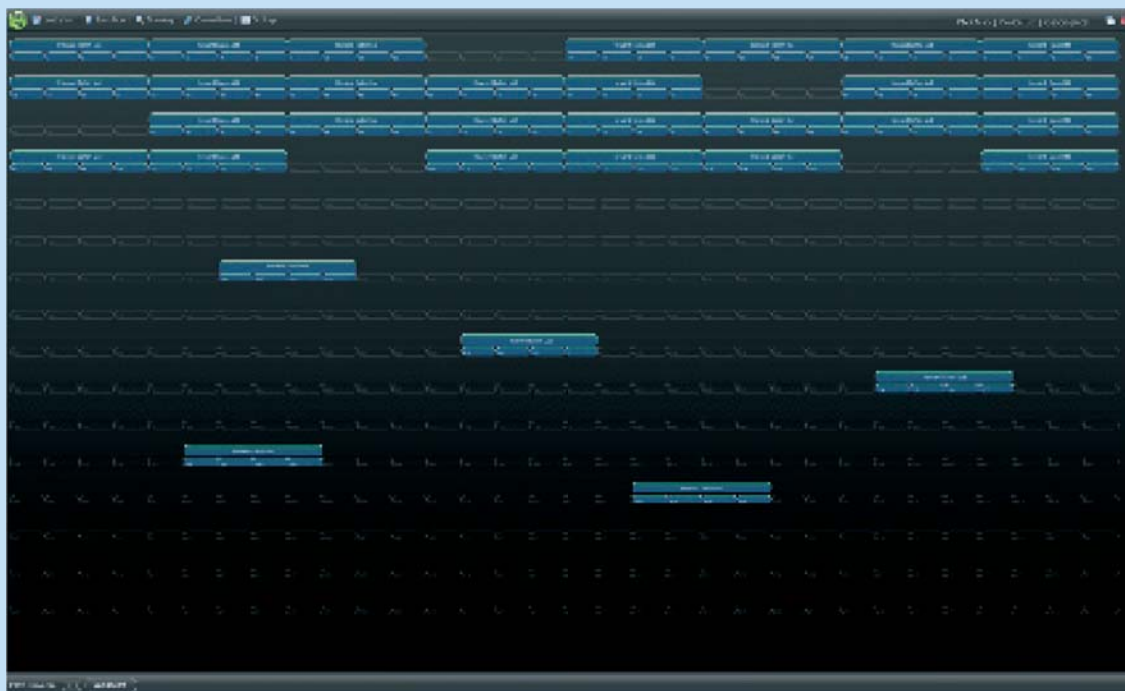

Visualize your system setup and devices and monitor RDM feedback.

CRM SuperNova™

Coexistence view:

View the entire wireless spectrum in real-time. Your traffic is green and other traffic is orange. Red indicates manually locked frequencies.

DMX map:

Use drag-and-drop to set DMX addresses and manage your RDM system.

CRM™, CRM Nova™ and CRM Outdoor™ are trademarks of LumenRadio. CRM is patent pending, CE and FCC approved. To purchase please go to www.crmnova.com.

SuperNova is free software that requires a customer provided computer and a CRM RDM Transmitter for full functionality.
